

X-TABLE

X-Table

A beautiful, iconic height-adjustable desk that is adjusted manually using a century-old principle known from car jacks, ironing boards and other iconic tools. All technical functions are integrated into the tabletop, which is available in black linoleum or white laminate.

The table comes with a cable lead-in and cable tray and measures 160 x 80 cm.

The desk can be adjusted from heights 65 – 127 cm, so you can easily change your working position during the day.

The X-Table is Danish produced and design to HOLMRIS B8 by the danish design trio KibiSi - Bjarke Ingels, Lars Holme Larsen and Jens Martin Skibsted.

FSC® certified*:

Our desktops are FSC certified.

*FSC® C104600.

Carbon offset furniture:
